

Workshop on Coastal Observation and Modeling Systems
September 8, 2020

Jeff Adkins

Jeffery Adkins is an economist working for NOAA's chief economist. He has worked as an economist for the federal government for more than 40 years, focusing on the marine economy for the past 25 years. Since 2001, he has worked with NOAA, BEA, and the Center for the Blue Economy to develop the Ocean Economy Satellite Account (OESA), which measures the U.S. marine economy within the System of National Accounts framework to produce results that are consistent with published estimates of gross domestic product.
