

Guillermo Leal Báez

General Director
INESPROC S.A. de C.V.,
Mexico

Civil Engineer from the Universidad Nacional Autónoma de Mexico. He is a certified expert in Hydraulic Engineering, a Senior Academic Member of the Mexican Academy of Engineering, and recipient of the National Hydraulic Engineering Award "Francisco Torres Herrera," in recognition of his professional career.

The quality of his technical articles has been acknowledged by the College of Civil Engineers of Mexico, which awarded him the National "Miguel A. Urquijo" Award for Best Technical Article in Civil Engineering in 2012 and 2017. Internationally, he was recognized by the Danish Hydraulic Institute for his use of hydraulic simulation models.

Since 1996, he has served as the General Director of INESPROC S.A. de C.V., a company ranked among Mexico's 50 most prominent consulting firms in the hydraulic sector, specializing in water resource studies in Mexico, as well as visionary and executive hydraulic infrastructure projects.

He is part of a group of experts, serving as a member of the Water Committee and Coordinator of the Water Subcommittee for the Valley of Mexico Basin at the CICM. He is also the founder and President of the first Board of Directors of the Mexican Association of Water Engineering and Sciences (AMINCA).
