

## **Dr. Jose Salinas**

**Associate Director,  
Analytics & Modeling, I  
nsurance Solutions,  
Moody's RMS  
UK**

Dr. Jose Salinas is a member of the RMS Flood Model Development team in London since 2019, where he has been a core developer for the China Inland Flood Model. In recent months, he has contributed to the advancement of the US and Europe Flood model methodologies for real time quantification of flood hazard for events such as Hurricane Ida or the July 2021 floods in Germany and Belgium. Jose holds a diploma in Civil and Environmental Engineering from the Polytechnic University of Valencia (Spain) and a PhD in Engineering Hydrology from the Vienna University of Technology (Austria). His research interests include stochastic rainfall modeling, hydrometeorological extremes, and regional flood frequency analysis.
