

Robert Andrew Jane is a research assistant professor of coastal risks and engineering at the University of Central Florida (UCF) in the Department of Civil, Environmental and Construction Engineering with a secondary joint appointment with the National Center for Integrated Coastal Research. He obtained a bachelor's degree in mathematics and statistics in 2013 and a Ph.D. in civil engineering in 2018 at the University of Plymouth. He then joined UCF as a post-doctoral researcher in 2019. His research focuses on applying statistical methods to improve our understanding and ability to make predictions about environmental phenomena to support effective water resource management.
